DETAILED ACTION

1. The Examiner would like to note that the present application has been reassigned to a new Examiner.
2. In the interest of expedited prosecution, the Examiner recommends conducting an interview prior to filing a response to the present application. Since the claimed subject matter, as best understood by the Examiner, appears to be allowable over the prior art of record, an interview to discuss the outstanding rejections under 35 U.S.C. § 112 is recommended. Applicant is encouraged to prepare a proposed amendment to overcome the § 112 rejections and contact the Examiner to schedule an interview to discuss any remaining issues.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
4. Claims 1-30, 35, 36 and 45 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
5. With regard to claim 1, the relationship between portions of the data structure in the unsolicited message and the remainder of the claim is unclear. For example:

the “third field” contains a port number to be used when establishing a TCP/IP connection with the network server. It is unclear if this is intended to be “packet data protocol connection” mentioned in the seventh field and in the establishing step or a separate connection;

the “fifth field” comprises a key used to calculate a response to “the SMS message”. There is insufficient antecedent basis for this limitation in the claim;

the “seventh field” comprises a quality of service that the network specifies the mobile station request when using the “packet data protocol session”, but the quality of service is not used in the establishing step. It is unclear if the act of “requesting” the QoS is intended to be incorporated into claim 1.

Claims 16 and 24 contain similar limitations and are rejected under the same rationale.

6. With regard to claim 3, the limitation “wherein the first data packet network address comprises an Internet Protocol of an X.25 protocol address” is unclear. Claim 1, from which claim 3 depends, states that the “second field contains an IP address comprising the first packet data network address”. An “IP address” cannot comprise a “packet data network address” that is an “X.25 address”.

Claims 8, 18, 23 and 27 contain similar limitations and are rejected under the same rationale.

Art Unit: 2153

7. With regard to claim 9, the limitation “examining an activation code” in line 3 is unclear. It is unclear if this is intended to be the “GPRS activation code” of claim 1, from which claim 9 depends, or a different activation code.

8. With regard to claim 45, the limitation “wherein the data structure is formatted according to the format of the data structure shown in Figure 3” is unclear. It is unclear what subject matter Applicant intends to incorporate via this limitation. The “data structure shown in Figure 3” is not specifically defined, and the discussion accompanying Figure 3 even acknowledges that there may be different “layout versions” and lists examples of the type of information that may be stored in portions of the data structure (Specification, 19, ll. 6-12). Furthermore, the use of the language “formatted according to” makes it unclear if the intended subject matter is exactly the same as the data structure shown in Figure 3 or if Figure 3 is merely intended to guide the formatting. For at least these reasons, the scope of claim 45 is not ascertainable to one of ordinary skill in the art.

9. All claims not individually rejected are rejected by virtue of their dependency from the above claims.

Allowable Subject Matter

10. As discussed above, it appears that claims 1-30, 35 and 36 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph,

set forth in this Office action. The Examiner recommends preparing a proposed amendment to overcome the outstanding rejections and contacting the Examiner to schedule an interview to discuss any remaining issues.

Conclusion

11. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
